PROFIL PERSONAL

Bachelor of Informatics Engineering with strong interest in backend engineering, distributed systems, and enterprise-scale application development. Experienced in building high-throughput microservices and production-grade backend systems using Java, Golang, PHP, Javascript & Rust for manufacture, SAAS & logistic industry. A curious and analytical person with strong ownership mindset, problem-solving skills, and ability to collaborate with global stakeholders in fast-paced environments. Proven experience in optimizing API performance by up to 40%, supporting systems handling more than 400K transactions per day, improving SEO traffic of a news portal by over 100%, and developing enterprise applications integrated with warehouse operations and SAP workflows.

EDUCATION

Universitas Gunadarma
Bachelor Of Computer – GPA: 3.61/4.00 September 2019 – August 2023

WORK EXPERIENCE

PT. BYD AUTO INDONESIA

Software Engineer February 2025 – Now

- Developed and maintained enterprise-scale backend services and microservices using Java Spring Boot to support warehouse operations, SAP-integrated workflows, and internal business applications.
- Optimized API performance and database queries, improving response time by up to 40% and supporting high-volume operational processes.
- Managed and supported 12+ interconnected microservices, including Cloud Platform, ERP, LES, SAP, and XXL-JOBS scheduler services, supporting production systems with 400K+ daily transactions.
- Developed a Network Management System (NMS) using Python and Django, integrating SSH, Zabbix, Cisco Catalyst, and Huawei to automate network monitoring, device synchronization, scheduling, and webhook-based workflows, reducing manual processes and improving network failure identification by up to 30%.
- Implemented observability and monitoring solutions using ELK Stack and Grafana to improve log analysis, issue tracing, and production reliability.
- Contributed to troubleshooting, root cause analysis, production support, and scalable system delivery while collaborating with cross-functional and international stakeholders.

PT SAINT GOBAIN INDONESIA

Supervisor of IT Application Developer September 2024 – December 2024

- Collaborated with IT teams from China and Thailand to support and enhance enterprise applications for manufacturing operations across regional environments.
- Developed and maintained internal enterprise applications to improve operational efficiency and support production-critical business processes.
- Conducted Product AI SG Chat training sessions for manufacturing users, including guidance on effective usage, AI adoption, and security awareness best practices.Made and corrected the final test about 1000 sheets
- Provided application support, troubleshooting, and continuous system improvements to ensure stability and reliability of production-critical systems.
- Worked closely with cross-functional stakeholders to translate manufacturing and operational requirements into scalable technical solutions.

PT. CREATIVE INDIGO PRODUCTION

Senior Web Developer September 2023 – August 2024

- Maintained and enhanced CMS and API services to support daily operations of a high-traffic entertainment news portal.
- Led the migration and revamp of the portal frontend from React.js to Next.js SSR, improving SEO performance and increasing website traffic by more than 100%.
- Developed scalable backend services and APIs to support content management, publishing workflows, and real-time portal operations.
- Collaborated with cross-functional teams including content, design, and business stakeholders to deliver new platform features and performance improvements.
- Built and optimized the core frontend system for desktop and mobile web platforms to improve user experience and website responsiveness.
- Contributed to the development of Cumishop and other internal platform initiatives to support business expansion and digital operations.

PT. BUMI SERPONG DAMAI TBK

Outsystem Developer Intern March 2023 – May 2023

- Developed dashboard security inspection mobile & web apps using OutSystems.
- Developed custom PDF reader package using JavaScript and C#.
- Collaborated with stakeholders to improve internal apps.

PT SHIPPINDO TEKNOLOGI LOGISTIK (SHIPPER)

Test Automation Engineer internship June 2022 – December 2022

- Developed and maintained automated testing for enterprise logistics and supply chain systems to ensure application stability and production reliability.
- Achieved more than 90% test coverage through implementation of automated test cases, integration testing, and continuous quality assurance improvements.
- Performed API, regression, and end-to-end testing for high-scale operational systems supporting logistics and warehouse processes.
- Contributed to improving software quality standards and reducing production issues through structured testing and defect analysis.
- .Awarded as **Best Mentee** in Shipper Academy for outstanding performance, fast learning capability, and contribution during the training and mentoring program.

PT PRAWIRANEGARA BAHAGIA SELALU (HEYLAWEDU)

Software Engineer Part-time December 2020 – April 2021

- Developed and maintained backend API services to support legal technology platforms and business process automation.
- Designed scalable and secure RESTful APIs using backend technologies to improve system integration and application performance.
- Collaborated with frontend developers, product teams, and stakeholders to deliver new features and enhance user experience across digital legal services.
- Optimized database queries and backend workflows to improve response time and operational efficiency of internal systems.
- Supported deployment, troubleshooting, and maintenance activities to ensure system reliability and stable production performance.
- Contributed to the development of API service architecture for scalable enterprise applications and third-party integrations.

PT LINTAS TELEMATIKA NUSANTARA

Software Engineer (Project Based) June 2020 – August 2020

- Developed mobile API services for Duniamurah.com to support mobile commerce functionality and customer transactions.
- Built and maintained backoffice applications for Duniamurah.com to improve operational workflows, product management, and internal business processes.
- Developed API services and admin systems for Geraiemas.com to support digital gold transaction management and administrative operations.

- Collaborated with development teams and stakeholders to deliver scalable web and API solutions aligned with business requirements.
- Performed system maintenance, troubleshooting, and feature enhancements to ensure stable application performance and reliability.

ICRAFT

Frontend Developer (PROJECT) September 2018 – February 2019

- Developed and maintained frontend features for the QELOLA product management system to support project and operational workflows.
- Built responsive and user-friendly interfaces to improve usability and user experience across the platform.
- Collaborated with backend developers and stakeholders to implement business requirements into functional frontend modules.
- Integrated frontend applications with backend APIs and optimized application performance for better system responsiveness.
- Participated in debugging, troubleshooting, and enhancement activities to ensure stable and reliable application performance.
- Contributed to the delivery of scalable web applications aligned with the QELOLA brand and business objectives.

PT BAREKSA PORTAL INVESTASI

Software Engineer Internship January 2018 – March 2018

- Developed a server monitoring web application using Laravel and MySQL to support infrastructure monitoring and operational visibility.
- Implemented Redis caching and automated CRON jobs to improve application performance, scheduling processes, and system efficiency.
- Integrated Firebase notification services with Slack to provide real-time system alerts and operational monitoring updates.
- Deployed and maintained applications on CentOS production servers to ensure stable and reliable system performance.
- Performed quality assurance and testing activities for Bareksa and Syailendra mobile applications to improve application stability and release quality.
- Collaborated with development and operational teams to troubleshoot issues, optimize workflows, and support production environments.

COMPETITION

LKS SMK PROVINSI BANTEN - DINAS PENDIDIKAN PROVINSI BANTEN

FINALIST – WEB TECHNOLOGIES APRIL 2019

- Developed a web-based election (KPU) application using native PHP, JavaScript, and MySQL within a 20-hour competition timeline.
- Designed and implemented frontend and backend functionalities including voting workflows, data management, and user interaction features.
- Competed against vocational school representatives across Banten Province in the Web Technologies category.
- Demonstrated problem-solving, time management, and rapid development skills under intensive competition conditions.

LKS SMK KOTA TANGERANG SELATAN – DINAS PENDIDIKAN KOTA TANGERANG SELATAN

1ST WINNER – WEB TECHNOLOGIES MARCH 2019

- Achieved 1st place by developing a Library Information System using PHP, CSS, vanilla JavaScript, and MySQL within a 10-hour competition duration.
- Built core application features including book management, borrowing transactions, member data management, and reporting modules.

- Demonstrated strong frontend and backend development skills, database design capability, and efficient problem-solving under strict time constraints.
- Achieved typing speed of 120 BPM during the competition, enabling fast development execution and efficient project delivery.

CERTIFICATES

- Web Technologies Winner – LKS SMK KOTA TANGERANG SELATAN | **2019**
- Best Mentee – SHIPPER ACADEMY| **2022**
- "BEST PROJECT UKK FOR INVENTORY APPLICATION WEB CATEGORY" of SMK BINA INFORMATIKA| **2019**

SKILLS

Technical Skills

- Java, Spring Boot, PHP, Laravel, JavaScript, TypeScript, Next.js, React.js, Golang, Rust, Python
- REST API Development, Microservices Architecture, SQL Optimization, System Integration
- MySQL, PostgreSQL, MongoDB, Redis
- Docker, Linux/CentOS Server, CI/CD, Git, Postman
- ELK Stack (Elasticsearch, Logstash, Kibana), Grafana
- Firebase Notification, CRON Jobs, SAP Integration, SEO Optimization
- Manual Testing, API Testing, Automation Testing, QA Testing
- Microsoft Office, Figma, VS Code, IntelliJ IDEA

Tools & Platforms

- Spring Boot, Laravel, Node.js
- MySQL, MongoDB, Redis
- Docker, Vercel, Linux Server
- Grafana, Kibana, GitHub, GitLab
- Firebase, Slack Integration

Soft Skills

- Problem Solving
- Analytical Thinking
- Teamwork & Collaboration
- Communication Skills
- Leadership & Ownership
- Time Management
- Adaptability
- Fast Learning
- Critical Thinking
- Attention to Detail
